Connect to pen with the computer USB port or the charger. During the charging, the red light illuminates closing to the USB connector. When the battery is fully recharged, the red light will be off.

Please Notice:
The recorder has a built-in high-capacity lithium polymer battery. It can be used and charged at any time. But for the first five charging times, please charge battery to the maximum, after the battery runs out. This will activate the batteries maximum capacity and maintain in the standard working time.

12. Reset
If the recorder stops responding, please use the suitable non-metallic tool to push the RESET button.

Please Notice:
If the device stops working due to improper operation or other unknown reason, please reset it slightly.

Fact Sheet of Campen:

Please read the instructions carefully.
◆ If the device no longer takes records video or audio (the status light immediately turns back to yellow illuminated), connect it to your computer and check whether there is enough memory left. If this is not the case, you should fist save your data and then delete it from the device.
◆ Should the device system crash, press the lower of the two holes at the back (reset) with a thin piece of wood. The device restarts. If that does not work, wait until the battery is dead. Recharge the device until the battery is completely full.
◆ While recording videos, move the device slowly and not abruptly, because this could lead to image fragments and audio noise.
◆ To view your videos easily, use Windows Explorer or search My Computer using the correct removable disk drive.
◆ To conserve the battery, the device turns off automatically after about seconds (when not use).
◆ Please note that the video records quality is very dependent on the brightness. In dark rooms, the quality of the images will fade.
◆ Your operating system should be up to date, so that a well functioning USB connection can be guaranteed.
◆ If you can only hear an audio, but do not get picture. It is probably because of the Windows Media Player. We recommend the installation of the VLC player. This is free player can be downloaded on the internet.
◆ Video/Audio records can only be deleted on the computer, but not directly from device. With the reset button, the records can not be deleted directly from the device.
